

Data Entry for a Fortune 500 Company

The Situation

Our customer is one of the largest mobile phone manufacturer, distributor and retailer in the world. They wanted the vendor to digitalize and store all their China Branch's products information forms, customs declaration forms and invoices. At the same time, the vendor has to submit related information and data into their CRM and the Chinese governments and follow up with them. Based on the procedure followed in the pilot run, it became quite evident that the application in which data had to be entered had to be dynamic. Devott Service built a VB application for the data entry phase to avoid any conflicts in data entry process.

The Solution

- ◆ Products information forms processing
- ◆ Invoice forms processing
- ◆ Customs declaration forms processing
- ◆ Data classification and analysis
- ◆ Paper documents scanning
- ◆ Data capture and cleanse
- ◆ Online data population into customer system
- ◆ Online data research
- ◆ Paper documents storage
- ◆ Software development
- ◆ Following up and submitting forms to various Government Departments

The Result

Devott Service met the challenge that has won it rave reviews from the client. We offer extensive data conversion and entry solutions. We deliver converted data that meets the accuracy level of 99.995% and the tightest turnaround times.
